

Wall Plate with Shutter

Safenet Universal Faceplate with Shutter is a Stylish, flexibility, durability, aesthetic and easy-to-install designed which is ideal for data, voice and A/V connectors. The Shutter design prevents dust and protects jacks to keep the best quality in performance and accept all safenet keystone Jacks whether it is a Cat.5e, Cat.6, Cat.6A or Cat7. The screws are hidden in the back of the gang frame and get a clean look.

These are available in a variety of port configurations to meet all work area outlet application needs, and provide for easy outlet identification
